

2B Token Operations: Reshaping Enterprise Growth Engine

2B
TOKEN

Core Logic: From Selling Connectivity to Selling Industry Solutions, Achieving Value Leap

1. Monetization Path and Product Matrix

1

Connectivity: Build High-Value Token Transmission Channel

- 5G-A private network
- OTN dedicated lines
- Edge network
- Integrated computing power network

2

Computing: Build Token Intensive Production Factory

- Unified scheduling through computing network brain
- Cross-domain lossless interconnection
- High-efficiency computing power supply

3

AI Capability: Build Neutral and Secure Model Shelf

- 300+ mainstream models
- Secure model services
- Multi-modal, multi-scenario coverage
- Continuous updates and optimization

4

Industry Solutions: Full-Scenario Token Consumption Loop

- Deep industry solutions
- Token-driven closed-loop consumption
- Measurable value, continuous growth

Target Customers	Solution Name	Core Content	Delivery Model
 Government & Public Sector	Smart Governance Network Solution	Private network, secure transmission, data sovereignty, AI empowerment for government services	 Private Deployment / Hybrid Cloud
 Manufacturing Enterprises	Industrial Internet & Intelligent Manufacturing Solution	5G-A private network, edge computing, equipment interconnection, intelligent quality inspection, predictive maintenance	 Hybrid Cloud / Edge Deployment
 Financial Institutions	Intelligent Finance Solution	High-performance network, secure computing, AI risk control, intelligent customer service	 Private Cloud / SaaS
 Healthcare Institutions	Smart Healthcare Solution	Secure transmission, medical AI model library, image analysis, remote diagnosis	 Hybrid Cloud / Private Deployment
 Education Institutions	Smart Education Solution	Campus private network, AI teaching assistant, learning analytics,	 SaaS /

Smart Manufacturing at a Leading Auto Plant

Built 5G-A private network + edge computing platform, achieving real-time control of 5,000+ devices, increasing production efficiency by 28% and reducing operation & maintenance costs by 20%.

AI Empowered City Governance in a Coastal City

Integrated AI models for urban management, improving event handling efficiency by 40% and citizen satisfaction by 35%.

Intelligent Risk Control for a Leading Bank

Deployed secure model services for credit risk assessment, reducing bad loan rate by 15% and approval efficiency by 50%.

AI-Assisted Diagnosis in a Top Hospital

Applied medical imaging AI models, improving diagnosis accuracy by 10% and reducing misdiagnosis by 5%.

Rebuild Value Logic
From connectivity sales to value-driven token operations

Activate Growth Engine
Token drives momentum, solutions create compounding growth

Ensure Security & Compliance
End-to-end security, data sovereignty, compliant and controllable

Deep Industry Empowerment
Full-scenario solutions, closed-loop consumption, achieving value leap
